lucityUNIVERcity

lucity bootcamp

Designed for end-users of Lucity web, mobile and GIS, this one-day class provides a good overview of Lucity's functionality, power, and purpose.

Details:

dates & locations available at support.lucity.com
Cost: $200 per registrant
schedule: 9:00am - 3:00pm, lunch and refreshments provided

This presentation style class will cover the basics of using Lucity in the web environment and the mobile tablet environment. We will be:

- Demonstrating Web Dashboard functionality
- Demonstrating Web Grids/Forms Maps functionality
- Demonstrating Lucity mobile (Android and/or iOS) functionality
- Creating, tracking and closing Requests and Work Orders will be highlighted along with the use of both the web map and the mobile map.
- Performing field inspections from Work Orders as well as creating both Requests and Work Orders based on the results of the inspections
- Demonstrating the various ways that the PM/Template module can help
- Demonstrating the new web scheduling tool
- Answering specific questions brought by users about how they can work more effectively.

For those of you who attended this course last spring, this year's content has been updated as follows:

- Removing references to the desktop product – we will exclusively deal in the web and tablet and their mapping components
- Adding a larger section regarding PMs and specifically how they work – especially the new features that were added in Version 2016+
- Incorporating some of the new functionality that has been included in Version 2016r2 and Version 2017.

Training Date	Location
April 4, 2017	Overland Park, KS
April 12, 2017	Irvine, CA
