

lucityUNIVERcity

lucity + crystal reports

Designed for people who are responsible for developing and enhancing Lucity reports using Crystal Reports, this two-day class will help intermediate to experienced Crystal users understand the relationships to the Lucity data from within Crystal and how to manage web reporting.

Details:

dates & locations available at support.lucity.com

Cost: \$750 per agency, max of 3 attendees per agency)

schedule: 9:00am - 3:00pm, lunch and refreshments provided

This training is a presentation style class that is recommended for users who have experience working within the Lucity environment and have some previous experience with Crystal Reports. Some of the specific items to be covered are:

- Modifying Existing Reports and creating new ones from scratch.
- Getting the reports correctly pointed to your data to run outside of the Lucity environment.
- Demonstrating adding and removing fields, adding tables and linking them, using formulas, sorting, grouping plus adding summaries and parameters.
- More advanced topics including the use of sub-reports and graphs.
- Lucity specific issues will also be addressed such as adding a comment to a report, showing linked work orders and requests and handling child and grandchild data. In addition, there will be attention on necessary setup of reports for use in the web environment.

Training Date	Location
